Specification

Magazine

One of the construction industry's leading titles...

Specification Magazine is now firmly established as one of the leading Architectural and Building titles in the Construction industry. The mix of professional editorial comment, manufacturer led articles and product information are presented in a style that is unsurpassed within the construction press.

Printed on oversize A4 quality stock paper Specification Magazine stands out from the crowd to ensure that it creates the best possible platform to help promote your brand and product message.

Published 12 times per annum, each issue is also reproduced in an online digital format to meet the increased demand from our growing online community.

Our new website www.specificationmagazine.com also carries many of the editorial items featured in the printed issue and has links to our unique brochure library www.thebuildingproductlibrary.com.

What our readers say:

“Excellent combination of technical and product information” - Les James Private Practice Architectural Technician

That is well read and well respected by your target audience

Specification Magazine is currently circulated to over 18350 specifiers working across a broad range of projects, each week we utilise our direct feed in from Glenigan to ensure that our circulation is kept 100% up to date with working specifiers. (See our ABC circulation breakdown on page 10)

Key Content:

Sykes on Seven & Eight:

Architectural Journalist Christopher Sykes takes an often side ways look at what's dominating the construction landscape.

Ruth Talks:

Architectural Journalist Ruth Slavid continues her highly readable sector reports with a series of interviews with key influences within the construction industry and follows this each month with an in depth look at a relevant project on the sector in question. (Read Ruth's Blog at www.specificationmagazine.com)

Product Features:

Three key product features that will concentrate on product specification, project analysis, and the demands brought about by the increased changes to the UK building regulations and codes for sustainable building.

Products in Focus:

A monthly round up of new products and manufacturer press information broken down across the following product categories.

- New Product Development
- Roofing, Cladding & Insulation
- Drainage & Water Management
- Structures
- Bricks, Blocks & Lintels
- Ground & Concrete Work
- Paints Stains & Finishes
- Glass & Glazing
- Safety, Security & Fire Protection
- Heating, Ventilation & Air Conditioning
- Doors, Windows & Entrance Systems
- Lifts, Stairs & Balustrades
- Interiors & Lighting
- Kitchens & Bathrooms
- Ceilings & Partitions
- Floors & Walls

Monthly Supplements

These special supplements will run on a quarterly basis in rotation and cover the following key topics:

1. Sustainable Building
2. Public Sector Building
3. Hotel, Sport & Leisure
4. Housing

Please see the following synopsis on each of the supplements for further details on each of the editorial subjects that will be covered.

What our readers say:

“Brilliant Magazine Priceless for Product Information” - Mark Wallinger Design & Build Contractor

What our readers say:
The magazine is great - Paul Hiham Mechanical & Electrical Consulting Engineer

Sustainable Building Supplement

Published Jan - May - Sept

Each of the three supplements published during 2010 on the subject of Sustainable Building will cover the following areas:

1. Legislation

Buildings have to satisfy a growing range of requirements: the Code for Sustainable Homes, BREEAM, increasingly strict and changing building regulations, and specific guidance, such as the Mayor of London's requirements. How can the construction industry satisfy all these requirements, both in terms of the design of buildings, and the components used?

- Code for sustainable homes
- Breeam , A+ ratings, specification guidance
- Changes & Upgrades to the building regulations.
- Specific guidance – eg Mayor of London.

2. The Manufacturing Process (Sustainable Manufacturers)

There is increasing interest from specifiers and some regulatory and client bodies about not only the performance of products but also their provenance. The concept of a 'cradle to grave' performance is being replaced by 'cradle to cradle', taking a product from the first extraction of materials through use to its eventual re-use. Questions to be answered include: What is the embodied energy/ carbon footprint? How easily and effectively can it be recycled? How green/ non-polluting are the components? Is the manufacturer doing any carbon offsetting?

- Carbon footprint
- Recycling process
- Embodied energy
- Cradle to cradle design of products
- Environmental impact of products

3. Products in Application

It is essential that products are not only fit for their ever-more-demanding requirements, but that they can be assembled easily and effectively. These sections will cover both the performance of 'everyday' products such as windows, flooring and roofing, and also specifically green products such as heat pumps, green roofing products and heat storage systems, and products involved in the supply of renewables and sustainable energy.

- Energy savings/ Thermal performance heating and energy efficiency
- Renewables and sustainable energy
- Life cycle of products
- Materials, testing and certification.
- Good detailing

What our advertisers say: "Excellent magazine with a good selection of editorial articles and product showcases" Mark Prior Marketing Manager.

The following key areas of Public Sector Building will be covered in each issue of the supplement.

1. Education

This is still the most buoyant area of the construction market, although costs are becoming more constrained. The Building Schools for the Future programme is continuing, and the renewal of primary schools is kicking in. And, following the debacle of the Learning and Skills Council funding, some further education buildings are going ahead. Sure Start is also continuing – for the moment. The special issues of education buildings which these features will address include: the need for robustness; rapid design and delivery; the increasing role that education buildings play in the community; the need to demonstrate sustainability; high acoustic standards. These features will look at how these and other factors influence design and specification.

- Building Schools for the Future
- The primary education programme
- Further education buildings – what future following the LSC debacle?
- Technology demand
- Schools within the community
- The asbestos legacy
- Sure start – where next
- Schools as demonstrator projects of sustainability

2. Health

The healthcare environment is one of the most demanding. Hospital design has to accommodate new types of treatment, the latest thinking on infection control, and the move towards single rooms. Some of this will be new build, and some will involve refurbishment of existing facilities. Primary healthcare is the fastest changing area, with the move towards larger and more inclusive primary care facilities, which need a civic presence, and may include functions beyond healthcare. In addition, there are 'special' building types, such as the Maggie's centres and the Teenage Cancer Care Trusts.

Hospitals – new build and upgrading

Primary health care - new health centres, integration with other services, civic presence

Alternative buildings' – Maggie's, Teenage Cancer Trust

3. Urban Regeneration

As our lives change, and our demands on our environments, so our towns and cities need to adapt. Areas need to be regenerated to deal with the death of some traditional industries, and also changes ways of living and working, with more people likely to be working at or close to home. Features will include such aspects as shared surfaces, the need for parks and urban space, and improvements to street furniture and signage.

- Designing for changing lives
- Shared surfaces
- The end of zoning
- Living locally
- The death of industry

4. Infrastructure

As our transport and energy needs change, so will our infrastructure. There will be new types of interchanges, and facilities for electric vehicles and for cycling. At the same time, energy supply will change, with more district heating systems. Drainage and water supply will become ever more sophisticated as water becomes a more precious resource. Our features will look at what this means for design and specification.

- The changing nature of vehicles
- New interchanges
- Cycling
- Local energy supply

What our advertisers say: "It is a credit to the whole team at Specification Magazine that they have managed in the current trading climate to continue to produce what is with out question one of the most professionally produced magazines in the marketplace" Harry Watson SG Systems

Hotel, Sport & Leisure Supplement

Published Mar - July - Nov

Published three times during 2010 each supplement will cover the following key areas.

1. Hotel

Hotels need to change with changing markets. On the one hand there is a demand for budget accommodation, which will include increasing amounts of standardisation and off-site manufacture. On the other, high-end hotels need to offer ever-better facilities, whether in terms of restaurants and lifts, or of luxurious bathrooms and spas. Construction always needs to be as rapid as possible, while finishes need to be robust and reliable, making this an area of challenge and opportunity for the construction industry.

- New Build & Refurbishment
- Prefabrication
- Budget designs
- Plumbing
- Add on facilities – spas etc.

2. Sport

As Britain wakes up to the need to be a healthier and fitter nation, so the provision of sporting facilities becomes increasingly important. This fascinating area covers everything from facilities of Olympic standard, to those serving the community either as part of a school or as an independent facility. Many buildings need to be highly flexible, incorporating a range of facilities. And while we want to encourage a spirit of adventure, health and safety is also of primary concern in facilities that will be accommodating the young and the old, plus people with disabilities. This covers everything from non-slip floors to lighting and the safe installation of equipment.

- Olympics
- Venues and facilities
- Health & Safety
- Multi-use sports buildings

3. Leisure

Buildings for leisure can range from bars and restaurants, which need ever better design and higher standards to attract customers, to landscaping parks and recreation areas, which are becoming ever more intensively used, often serving as outdoor gyms as well as meeting areas. This puts great demand on surfaces and finishes, as well as play equipment, designed for use by children and sometimes by adults as well.

- Bars & Restaurants
- Landscaping, parks and recreation
- Play equipment
- Anti-obesity

What our advertisers say: "I have used Hotel, Sport & Leisure during the last year and have been pleased with the professional way they have dealt with Island Stone and the quality of the leads that they have produced" - Margot Neuhaus Island Stone Natural Advantage Ltd.

Housing Supplement

Published Apr - Aug - Dec

Housing Features

1. Private Housing

While construction of private housing has stalled over the last few years, the same is not true of housing need. There is an enormous pent-up demand for affordable homes, suitable for 21st Century lifestyles. At the same time there are the new environmental requirements, and new ways of treating the surroundings to housing developments, with concepts such as home zones affecting not only the layout of streets but also the materials used.

- Offsite construction
- SUDS and water recycling
- Paving and landscape materials
- Retrofitting environmental improvements
- Refurbishment

2. Social Housing

Social housing has to address a pressing and changing need. These features will look at the effect on design and specification of the need to design social housing for different user types – single dwellings, large families, particular ethnic groups and the elderly. They will also look at ways of meeting lifetime homes requirements, and at the particular demands of building on brownfield sites and infill sites. In many cases, the solution to building affordably in tight sites is an increasing use of offsite construction. The features will also examine ways to satisfy the code for sustainable homes, and move towards zero carbon homes.

- Building on brownfield sites
- Lifetime homes
- Building for different user types – single dwellings, large families, demands of particular ethnic groups, the elderly.
- Towards zero-carbon housing
- Refurbishing existing stock
- Change of use

3. Legislation

Legislation changes as rapidly in housing as in any part of the construction industry. We will look at what the latest changes are, and at their implications, as well as what is likely to happen in the future.

- Building regulations
- Code for sustainable homes

What our advertisers say:

“As a regular advertiser in the publications within in the TSP Media portfolio I have been delighted with the quality and level of sales enquires that I have seen from my advertisement campaigns. I am equally impressed with the level of knowledge and depth on content these titles consistently produce”

Tony Reed - Sales Director YBS Insulation

Circulation Details

CIRCULATION

Specification Magazine has a unique circulation compiled from four key elements of our managed database

Individually requested readers

Product enquirers (From preceding 12 months)

Working specifiers sourced exclusively from glenigan

Subscribers from The Chartered Institute of Architectural Technologists

In the last two years Specification Magazine has experienced an unprecedented 100% increase in its individually requested readership, an increase unsurpassed by any other Architectural or Building title in that period. In October 2009 Specification Magazine was approached by the Chartered Institute of Architectural Technologists whose members had expressed a wish to receive the magazine on a monthly basis. We have entered into an association with the CIAT that will be reflected in the magazines planned growth during 2010 to a printed circulation in excess of 20,000.

PR Product and Project Releases

All editorial submitted for inclusion within the products in focus section of the magazine levies a production charge of **£99.00**

(Please forward any relevant press material together with hi-resolution photography to our editorial coordinator Katie Wilcox on katie@tspltd.co.uk)

OTHER OPPORTUNITIES

Inserts are available. Prices are based on weight and quantity. For more details on tip-ons, gatefolds, and bellybands please contact your account manager.

Email material to: copy@tspltd.co.uk

Material must be supplied on Mac readable discs or via email or FTP.

PDF's should be print ready with all fonts and images embedded (min 300dpi).

Documents must be Quark Xpress.

Images must be saved as TIFF or EPS minimum 300dpi at 100% size.

Ensure all images are CMYK not RGB.

Ensure all colours are CMYK not RGB or SPOT including Illustrator files.

Artwork requiring further production may levy further charges which will be pre-quoted prior to implementation.

Cancellations in writing by the first working day of the month prior to the month of publication as our standard terms and conditions of sale state.

What our advertisers say: "Very professionally put together, I like the mix of technical and product editorial, it provides an excellent platform from which to promote my business" Mike Wood Telling Architectural

Specification Magazine - Online

WEB BASED PRODUCTS

www.specificationmagazine.co.uk

Our website is currently undergoing a redesign and will be fully operational from early 2010. Besides creating a platform for us to report on the news, products, and project stories that are most relevant to our readership, it will also incorporate a comprehensive product directory with links to our new online architectural product library site, "The Building Product Library" The website will also feature a blog where Architectural journalist Ruth Slavid will discuss and debate the topics and subjects at the forefront of Architecture in the UK.

Online advertisement sizes & rates per month:

Banner (Home)	£250	468w x 60 pixels	Banner (Category)	£125	68w x 60 pixels

Fortnightly product e-bulletin

Our fortnightly e bulletin is sent out to a circulation of over 15000 specifiers from our E-database and is a mix of product and project information that enables viewers to keep up to date with the latest manufacturers developments. On average each of the seven product or project releases are receiving over 70 views to the full article with click through rates in excess of 50% of the view rate.

E-bulletin per entry - £150.00

Contact Katie Wilcox for further information on 01952 234000 or katie@tspltd.co.uk

Product Listings

When you promote your products within any of our titles you can choose your listing appear online or an additional £25 with your press release in full. These can be enhanced further with the elements below.

Add Flash or Video to your listing Animation – Prices start at £125

Company Portfolio - £150, Includes a listing of your products that will be linked to in all your articles as well as links for users to read more on each product on your website.

Product Literature Listed on the Building Product Library - £250

Advertisement rates on The Building Product Library are extremely cost effective, rates are based on £250 per brochure insert for a twelve month period or until your brochure has received 100 enquiries whichever is the sooner. Brochures can be updated at any time during your contract period at no extra cost.

Brochure Listing	Advertisement Rates
1-6 Insertions	£250 per insertion
7-12 Insertions	£175 per insertion
13+ Insertions	£100 per insertion

Sponsored Listing - £400, Includes:

- Unique online advertisement with your company branding, imagery and content
- Statistics on View and Click Through Rate
- Link to your advertisement on left side navigation of every Specification Magazine page
- Advertisement will include links to your company website and contact details as required.

For an additional fee of £300 we can send the advertisement out to our email circulation of over 10,000. Or we can access over 35,000 email addresses on our database to provide a tailored listing to your company's products at £170 per 1000

Specification Magazine - Direct Mail

Purchasing mailing lists with TSP Direct

Providing your sales team with direct access to potential sales from specifiers, buyers and Procurement officers who are actually involved on active live projects.

At Tanner Stiles Publishing we pride ourselves on the quality of the circulation data we manage for our range of magazines, product cards and e-media products. Circulation data is always going to be more up to date than traditional mailing lists, simply because we are updating information from our clients on a daily basis. We have a strict regime in place to ensure that permission is specifically sought before we can release our list data for third party usage.

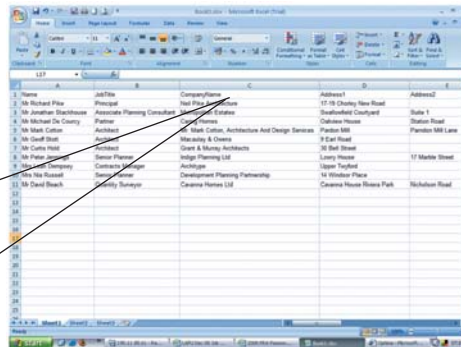

We specialise in specific markets which are broken down into the following sectors.

- Architecture & Building
- Local Authority
- Hotels
- Sport and Leisure
- Playground & Sport Activities
- Landscaping
- Amenity
- Housing Associations
- Registered Social Landlords
- Housebuilders

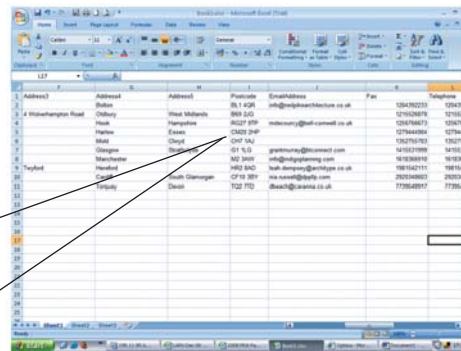

For costings and a demographic breakdown of your requirements please contact our sales department for further information or visit www.tspltd.co.uk/direct_mail.php where a list of job titles can be accessed and a request form emailed to our circulation department for action.

The following information is available:

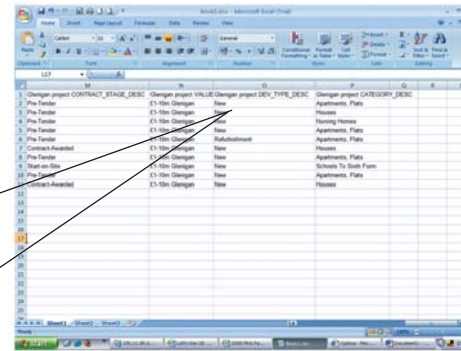

Name
Job Title
Company name

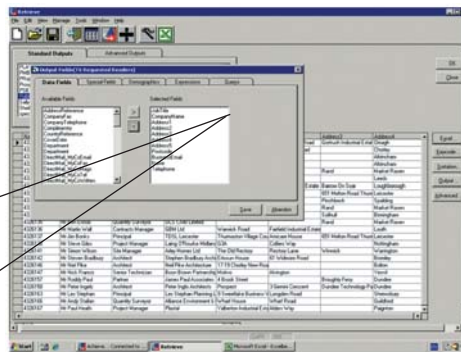

Address
Phone
Fax
Email

Project contract stage
Project value
Project type
Project category
